

The Ventilator Unit at Kensington Manor Nursing and Rehabilitation Center

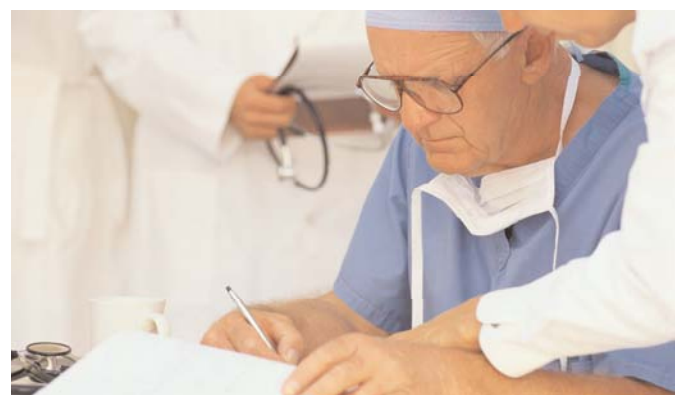

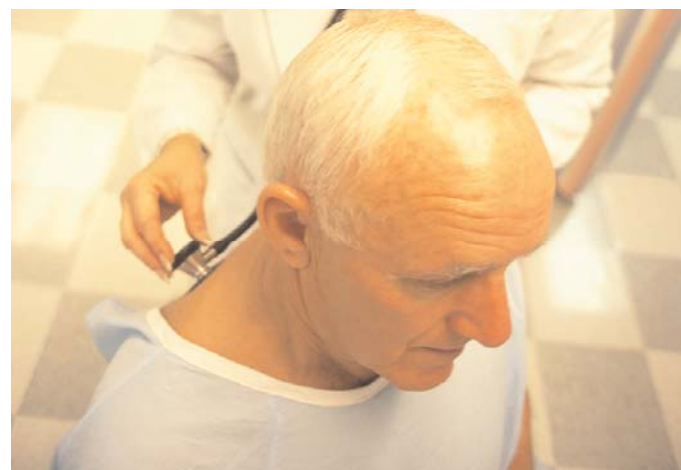

Exceptional People. Exceptional Care.

The 22-bed Ventilator Unit at Kensington Manor is staffed with clinicians who are experts in the field of ventilator dependence. Aggressive weaning techniques, a dedicated recreation team, and a commitment to the physical, social, and emotional well-being of the Unit's patients ensure that each individual is able to live life to the fullest.

An interdisciplinary approach to care combines the expertise of the Unit's Medical Director, Pulmonologist, Director of Social Services, Respiratory Care Director, Unit Nursing Manager, Registered Dietician, and Unit Activities Coordinator – all of whom work together to provide the highest quality of life for residents.
